Definitions of who is counted as a veteran varies by data source. These data are from the Census Bureau who defines veterans this way: "A "civilian veteran" is a person 18 years old or over who has served (even for a short time), but is not now serving, on active duty in the U.S. Army, Navy, Air Force, Marine Corps, or the Coast Guard, or who served in the U.S. Merchant Marine during World War II. People who served in the National Guard or military Reserves are classified as veterans only if they were ever called or ordered to active duty, not counting the 4-6 months for initial training or yearly summer camps. All other civilians 16 years old and over are classified as nonveterans."

*For counties with small populations and small population groups, the margins of error (indicated by a +/-) can be quite large.*

*The **margin of error** tells us how precise the estimate is by indicating the **range within which the estimate most likely falls**.*

*For help in understanding the margin of error, see the brief Kentucky: By The Numbers publication "[And Now for the Grain of Salt](#)."*

The 2023 American Community Survey 5-year estimates (2019-2023) that there were 235,118 (+/- 3,869) veterans in Kentucky. This issue of Kentucky: By The Numbers is in conjunction with the **Kentucky Extension Military Collaborative**. With funding from the UK Engage initiative, the Extension Military Collaborative is designed to increase awareness of the University's military engagement across the Commonwealth through developing a multidisciplinary statewide collaborative. <https://extension.ca.uky.edu/military>
