Family and Individual Development Data

Data provided in this issue of Kentucky: By The Numbers were **compiled to correspond to the issues** covered in the **Family and Individual Development** section of the University of Kentucky

Cooperative Extension Statewide Community Needs Assessment

<https://extension.mgcafe.uky.edu/community-assessment>

The statewide needs assessment was conducted to identify and prioritize community needs, issues, and/or opportunities that Extension could address through targeted educational programming and engagement efforts. The survey was divided into 4 areas:

- 1) Agriculture and Natural Resources,
- 2) Youth Development,
- 3) Family and Individual Development, and
- 4) Community and Economic Development.

These data have been compiled to assist in using the survey results for local planning. Data from nearly 40 different sources were selected and links to each data source are provided at the end. Secondary data for the other survey sections are available at <https://kybtn.ca.uky.edu/>. Margins of Error

For counties with small populations and small population groups, the **margins of error** (indicated by a +/- ##) or confidence intervals (indicated by a range) can be quite large. The margin of error or confidence interval tells us how precise the estimate is by indicating the **range within which the estimate most likely falls**. For help in understanding the margin of error, see the brief Kentucky: By The Numbers publication **“And Now for the Grain of Salt.”** Additional data are available at: Kentucky: By The Numbers website.
