

Vulnerable Populations During a Disaster

Trigg County

Julie N. Zimmerman and Jeff Young, 2026

Not everyone has access to the same kinds of resources to be able to plan for, respond to, and recover from a disaster. While it can be tempting to see vulnerability and resilience as opposite sides of the same coin, this is not always the case. A community with a large vulnerable population can still have high levels of resilience.

In addition to providing data from the **2023 American Community Survey 5-year estimates**, this issue of Kentucky: By The Numbers includes two maps as a way to visualize county results from the two resources: the Social Vulnerability component of the FEMA National Risk Index and the ATSDR/CDC Social Vulnerability index.

For additional data, the **Kentucky: By The Numbers data series** includes detailed data compiled for the Statewide Extension Community Needs Assessment as well as other topic-specific issues that contain data for each county and the state. These can be found at the Kentucky: By The Numbers website.

*For counties with small populations and small population groups, the margins of error (indicated by a +/- ___) can be quite large. The **margin of error** tells us how precise the estimate is by indicating the **range within which the estimate most likely falls**. For help in understanding the margin of error, see the brief Kentucky: By The Numbers publication "And Now for the Grain of Salt."*

Data from the American Community Survey 5-Year Estimates

	Estimate	Margin of Error
Households with one or more persons under 18 years old	1,596	(+/- 233)
Households with one or more people 65 years and over	2,327	(+/- 131)
Number of grandparents living with and responsible for grandchildren	190	(+/- 96)
Population with a disability (noninstitutionalized)	3,858	(+/- 430)
Poverty rate of families with related children under 18 who are related to the householder	31.0%	(+/- 8.8)
Poverty rate of people ages 65 and over	8.3%	(+/- 3.8)
Percent of population 16 years and over who worked full-time, year-round in past 12 months who were below poverty	5.8%	(+/- 3.0)
Number of occupied housing units that are mobile homes, etc	814	(+/- 197)
Percent of occupied housing units that are mobile homes, etc	13.5%	(+/- 3.3)
Number of households that do not have a computer, tablet, etc.	744	(+/- 173)
Number of occupied housing units (households) with no vehicle	517	(+/- 144)

On some websites, you can zoom in to see below the county level.

Social Vulnerability (FEMA National Risk Index)

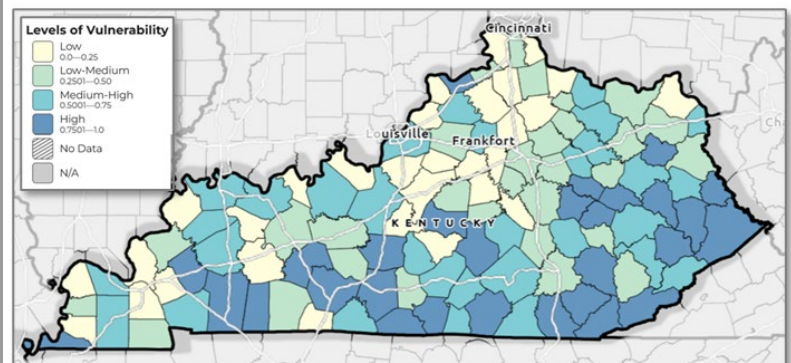

<https://hazards.fema.gov/nri/social-vulnerability>

The Social Vulnerability component of the National Risk Index defines social vulnerability “as the susceptibility of social groups to the adverse impacts” to events such as disasters. Building off of data from the CDC/ATSDR Social Vulnerability Index to generate its own scores this component also uses a different number of categories ranging from “very low” to “very high.”

The Social Vulnerability Index uses socio-economic and demographic data from the American Community Survey 5-year estimates to identify the extent to which local populations include those who could face difficulties during or after a disaster. The index uses 16 variables including poverty and population ages 65 and over. The data are combined into a single score and grouped into 4 categories.

Social Vulnerability Index (ATSDR/CDC)
